

We have received questions about how to set up email on the iPhone and Android with the new settings. Below are directions for setting up on an iPhone. I used an example FTS email for these pictures. Replace it with your own information.

To get started, open the SETTINGS applet from the home screen. Choose MAIL, CONTACTS, and CALENDARS from the list. If you have attempted to configure FTS email previously without success DELETE the inoperable account and then ADD ACCOUNT. Select MICROSOFT EXCHANGE for the account type. Enter your FTS email in the appropriate box. Input mail.flatherapy.com for the SERVER, flatherapy.local for the DOMAIN, and your username and password in their boxes. Ensure that USE SSL is ON and then proceed.

④ Snipping Tool    Location: 48.88282  
 Drag the cursor around the area you want to capture.

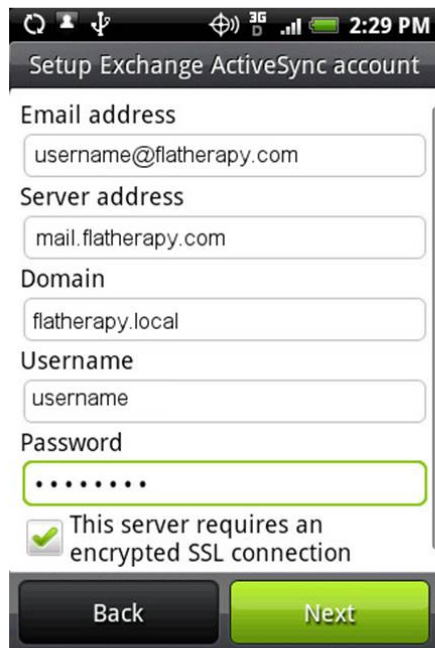

It will display a message regarding the identity certificate similar to the one shown below. Choose CONTINUE and it should then login and start to synchronize your mail to the device.

Encounter complete	Patient name	DOB	Reason for visit	Referring provider	Billing provider	Primary Payer Name	Primary Payer Number
02-10-10	ANNETTE	1959	Client Contact (NO DRG & Admit	AP-provider	AP-provider	WELLCARE STANWELL (14153)	0810207000
02-10-10	DANIELA JR. ELLIOTT	2005	TCM Child Progress Note - TCM	AP-provider	AP-provider	UNUM - UNITED BEHAVIORAL HEALTH (CA0187726)	081000877

We have received questions about how to set up email on the iPhone and Android with the new settings. Below are directions for setting up on an Android device. I used an example FTS email for these pictures. Replace it with your own information.

To get started, open the SETTINGS applet from the home screen. Choose ACCOUNTS from the list. If you have attempted to configure FTS email previously without success DELETE the inoperable account and then ADD ACCOUNT. Select MICROSOFT EXCHANGE / CORPORATE SYNC for the account type. Enter your FTS email in the appropriate box. Input mail.flatherapy.com for the SERVER, flatherapy.local for the DOMAIN, and your username and password in their boxes. Ensure that USE SSL is ON and then proceed.

It will display a message regarding the identity certificate. Choose CONTINUE and it should then login and start to synchronize your mail to the device.
